

DS-1 Measurement Accuracy

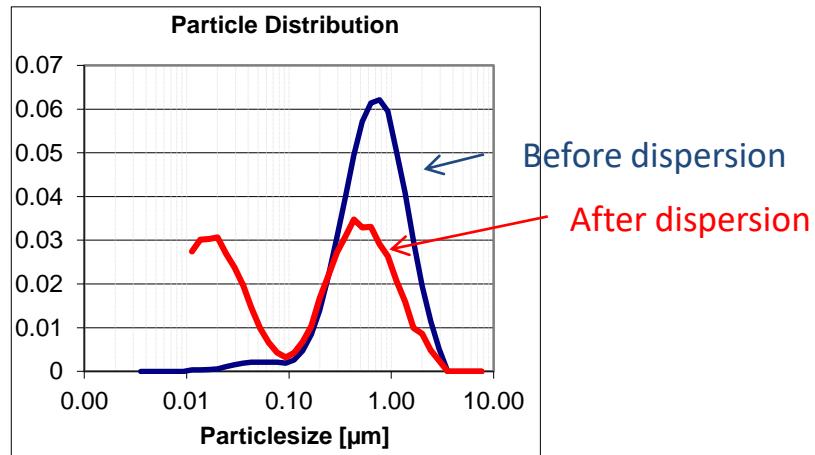

DS-1 Measurement Repeatability

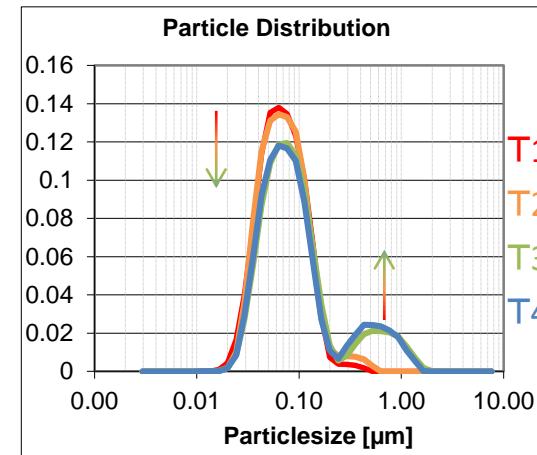

A)Theoretical Value (μm)	0.600	0.077
B)Measured D50 (μm)	0.599	0.081
Difference between A) and B)	0.001	0.004

D50 (μm) n=1	0.0815
D50 (μm) n=2	0.0800
C.V. (%)	1.3%

Re-Dispersion evaluation

Time dependent change evaluation

Experiment: Performed measurement after redispersing agglomerated sample

Result: >Before dispersion:
Distribution was observed around $0.9\mu\text{m}$.

>After dispersion:
The peak around $0.9\mu\text{m}$ became small and the another peak appeared around $0.02\mu\text{m}$.

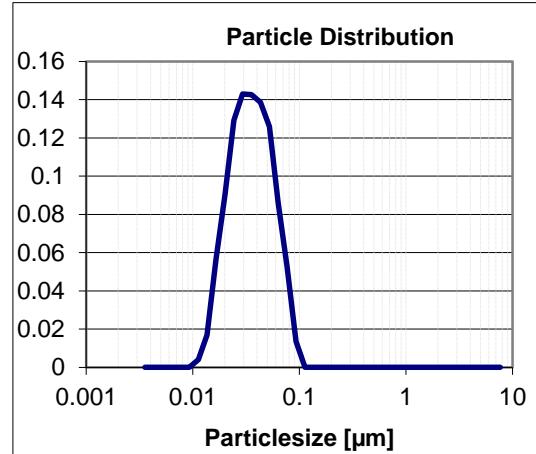

Examination: From the above result, we can understand that the size of agglomerates became fine because of redispersion

Experiment : Performed measurement changing the settling time of the agglomerating sample

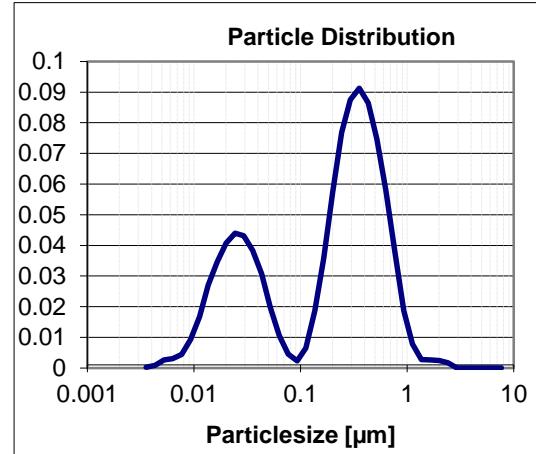

Result : The peak around $0.08\mu\text{m}$ decreased over time, on the other hand, the peak around $0.6\mu\text{m}$ increased.

Examination: We can know that particles agglomerated over time.

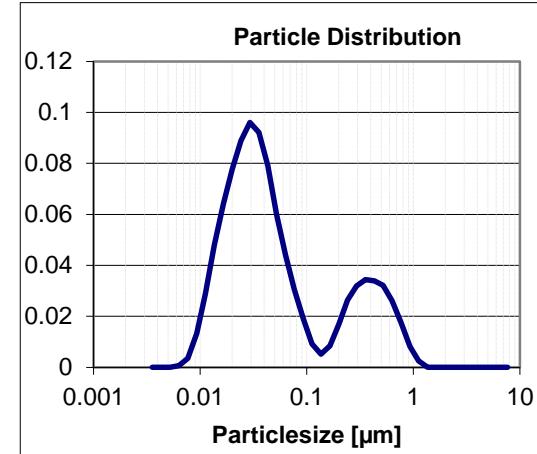

◆ Colloidal silica

◆ Barium titanate

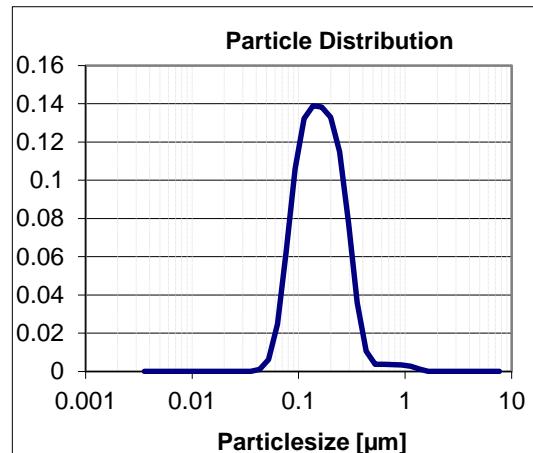

◆ Aluminum oxide

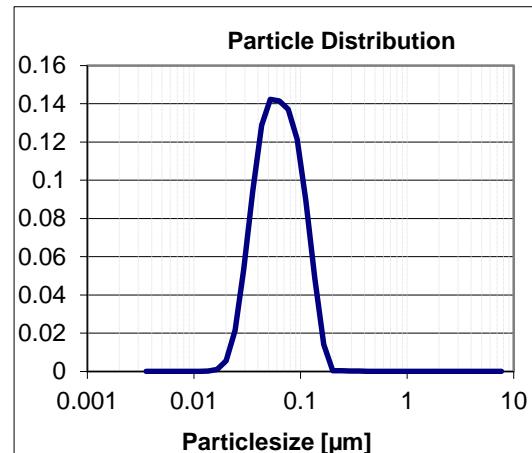

Particle Size (μm)	0.043	0.44	0.435
Concentration (vol%)	23	5	2.5
Material	Colloidal silica	Barium titanate	Aluminum oxide
Application Examples	Paper/Fiber/Battery/Catalyst Binder/Coating material/Abrasive	Laminated Ceramic Capacitor / Filler	Abrasive/ Catalyst / Electronic Parts
Material Manufacturers	Nissan Chemical/JGC Catalysts and Chemicals/ Fuso Chemical/ Tama Chemicals	Fuji Titanium/ KCM Corp., Nippon Chemical	Showa Denko / Nippon Light Metal / Denka / Nippon Steel & Sumikin Materials / Sumitomo Chemical

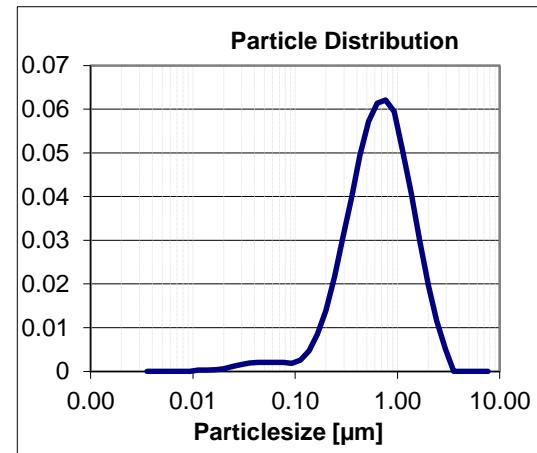

◆ Silica

◆ Iron oxide

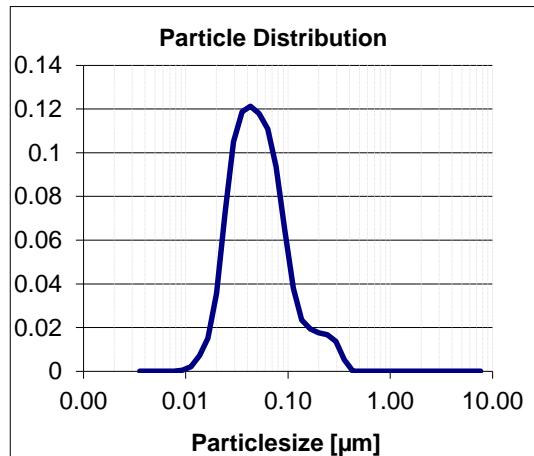

◆ Titanate oxide

Particle Size (μm)	0.15	0.074	0.96
Concentration (vol%)	10	1	1
Material	Silica abrasive	Iron oxide	Titanate oxide
Application Examples	Paint / Matting agent / Resin film / Cosmetics / Carrier(Medicine / Flavor) / Abrasive	Pigment / Toner / Magnetic tape / Ferrite / Cosmetics	Paint / Printing ink / Cosmetics / Electronic materials
Material Manufacturers	Admatechs / Fuji Silysia Chemical / Tosoh Silica	Toda Kogyo / JFE Chemical / Titan Kogyo / Tetsugen	Ishihara Sangyo Kaisha / Titan Kogyo /Sakai Chemical

◆ Cellulose

Particle Size (μm)	0.04		
Concentration (vol%)	10		
Material	Cellulose		
Application Examples	Cosmetics / Thickener		
Material Manufacturers			

Titanate oxide

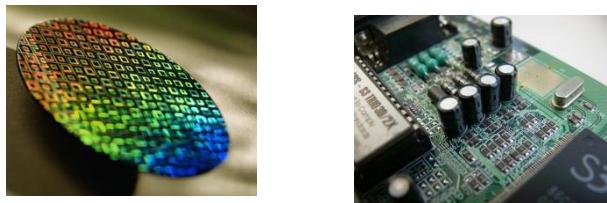

Barium titanate

Colloidal silica

Aluminum oxide

Iron oxide
